I love empowering peers to be more productive, reducing development times and increasing the reliability of applications at scale. I work across the stack, and specialize in anything frontend.

EXPERIENCE

15th April, 2019 – Present

Lyft

SENIOR SOFTWARE ENGINEER

Team Lead

- Team lead for an Insurance Marketplace for drivers to purchase policies. From MVP to multi-carrier support across Android, iOS and Web
- Lead an E2E testing initiative across all of Lyft leveraging Cypress and replaying network snapshots in CI to support jailed testing constraints
- Enable a 3x increase in productivity by leading the adoption for our entire org from a cloud based development workflow to a local workflow

26th June, 2017 – 31st January, 2019

Reflektive

SOFTWARE ENGINEER

- Team lead for our core 'Reviews' product
- Lead migration from Backbone to React
- Cut build time by 50% by migrating Webpack 3 > 4
- Migrated ~500 tests to Jest to reduce testing feedback loop

7th July, 2014 – 3rd June, 2016

IBM

SOFTWARE ENGINEER

- Developed internal websites to pitch solutions
- Developed data models to target customer behavior

EDUCATION

2017

2017

COMPUTER ARCHITECTURE

- Building a strong mental model of the actual execution of programs by a microprocessor to better reason about the code I write

2011 - 2013

2011 - 2013

BACHELOR OF COMMERCE

- Built systems for business administration with VBA & Excel
- Architected and Implemented relational databases
- Modelled publicly available financial data to provide company valuations
